OUR PROMISE

FAMILY-TO-FAMILY FARMING

Axis Seed™ is one of the fastest-growing independent seed companies in the U.S. because of our unique business model. Through local, family-owned Independent Regional Companies (IRCs), you have access to the latest genetics, traits, and technologies, backed by people who genuinely care about your success. What you can expect is a dedicated partnership where you receive premium products selected for your specific soil and profit goals. Because even as the industry evolves with new technologies, success will always come from the relationship—and our family wants to see your family succeed.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

Grow Strong™

ROOTED IN TEXAS.

Welcome to Axis Texas! We are proud to serve as your locally owned, independent source for elite corn and soybean seed products specifically selected for Texas soils.

My name is Chad Wetzel. I was born and raised on a farm in Grayson County, Texas, attended Texas Tech University, and have been blessed to live in Texas and be surrounded by production agriculture my entire life. I am a fourth-generation farmer and proud owner of Axis Texas Seed!

Together with my family, I am committed to helping Texas growers discover the products and solutions that are best for their farming operation.

Just like you, I am invested in the soil. I am not just selling the products in an Axis Seed bag, I am planting them on my own farm as well. Just as Axis Seed products excel on our farm, I am confident they will excel on yours too. My goal for Axis Texas is simple: to maximize your return on the most important raw material in the farming business – your seed.

AXIS TEXAS.

Farming in Texas is unique. Practices that work in the corn belt rarely work here, especially when it comes to seed selection. As an Independent Regional Company of Axis Seed, Axis Texas provides growers in the Lone Star State with access to the latest genetic and trait combinations from the nation's top breeding programs. This ensures you will receive the highest quality seed adapted for your specific needs, which makes all the difference at harvest.

We are grateful for the opportunity to earn your seed business for the 2020 growing season. Give us a call today – and let's **Grow Strong Together!**

CORN BRANDS

*Your soil is unique.
Get more from it with
select hybrids.*

NEW! **63D28** VT2P 113 Day Maturity

- Widely adapted hybrid with outstanding yield potential
- Outstanding agronomic package with excellent test weight
- Excels in high yield environment
- Late-season health and intactness

64B28 VT2P 114 Day Maturity

- Very good stalks and roots with respectable late-season intactness
- Strong emergence
- Excellent early plant vigor
- Excellent test weight on a semi-flex ear

64N21 VT2P 114 Day Maturity

- Good tolerance to heat and drought stress
- Produces long flex ears with good husk coverage
- Excellent grain quality and tip fill
- Position on moderate to well drained soils

NEW! **64Z08** CONV 114 Day Maturity

- Very high tolerance to Southern Rust and Goss' Wilt
- Widely adapted east to west with good southern movement
- Medium-long ears with 18-20 kernel rows
- Very good stalks

65H25 VT2P

115 Day Maturity

- High yield potential over a broad range of environments
- Very good stalks and drought tolerance
- Excellent grain quality
- Excellent test weight

Also Available: 65H15 RR2, 65H05 CONV

66R55 SS

116 Day Maturity

- Excellent test weight for possible food grade corn
- Excellent stalks and roots
- Semi-flex ear with the ability to work at moderate populations
- Very strong performance on all soil types and environments

Also Available: 66R05 CONV

66T27 VT2P

116 Day Maturity

- Exhibits tremendous stalk and root strength with lower greensnap risk
- Very good husk cover with good dry down
- Longer ear type with good tip fill and deep kernels
- High yield performance with very good stress tolerance

Also Available: 66T17 RR2

67K27 VT2P

117 Day Maturity

- Very good grain quality and test weight
- Very good late-season intactness
- Wide leaves and good canopy closure
- Good versatility across soil types

67Q17 3111 117 Day Maturity

- Broadly adapted with outstanding agronomics
- Excellent late-season plant health and grain quality
- Strong choice for highly productive irrigated and dryland acres

*Based on Local Observation

NEW! **68T58** SS

118 Day Maturity

- Semi-flex ear and very good test weight
- Medium-tall plant type with very good early vigor
- Strong stalks and very good roots
- Potential silage hybrid in a full-season product

Also Available: 68T08 CONV

SOYBEAN BRANDS

The truth is, there's no "average acre." So why choose an average bean variety?

NEW!

4520NRXS RR2X 4.5 Relative Maturity

- Beautiful light tawny/tan variety that is very uniform
- Mid 4 with STS and salt tolerance (excluder)
- Variety has performed well on mixed and clay soils

NEW! **4530GTLs** LLGT27 4.5 Relative Maturity

- STS tolerant variety
- Very uniform light tawny/brown
- Performs well on clays and loams

NEW! **4640GTL** LLGT27 4.6 Relative Maturity

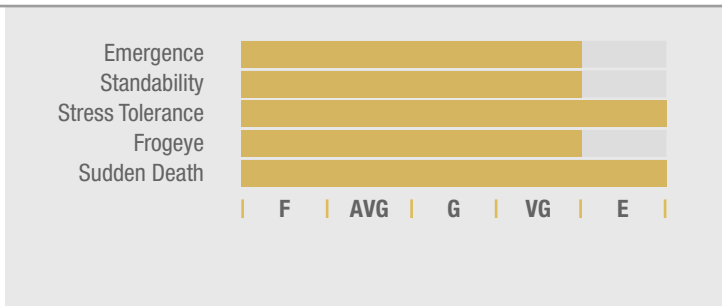

- Excellent lodging and Frogeye Leaf Spot tolerance
- Can go across all soil types in the Delta
- Excellent standability

4819NRXS RR2X 4.8 Relative Maturity

- Very good emergence and standability
- Excellent stress tolerance
- Excellent SDS scores

5016NRXS RR2X 5.0 Relative Maturity

- Moves east to west very well
- Great plant height
- Excellent PRR tolerance with good SDS

RR2X - Roundup Ready 2 Xtend® Soybeans

LLGT27 - LibertyLink® GT27™

SOYBEAN PIRACY STATEMENT

Seed containing a patented trait can only be used to plant a single commercial crop from which seed cannot be saved and replanted. Examples of seed containing a patented trait include but are not limited to Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, Roundup Ready® spring canola, and Roundup Ready® winter canola. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement and the Monsanto Technology Use Guide. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>

Protect your soybean seed investment with our
Revolve Treatment Options

Think Before You Bin-Run

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Genuity® Roundup Ready 2 Yield® soybean varieties and Roundup Ready 2 Xtend® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties*.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology

- High-yielding soybean technologies
- Better variety options
- Leading seed treatment options

Customer Service

- Dealer agronomic support before and after the sale
- Replant policy support
- Convenient packaging and delivery

Reliable Germination and Quality

- Rigorously tested and meets U.S. Federal Seed Act requirements
- Free of seed-borne diseases
- Properly stored and conditioned

Monsanto receives calls and letters each year about potential seed compliance matters. Anyone with a concern or question can anonymously call 1-800-768-6387.

*Genuity® Roundup Ready 2 Yield® soybeans and Roundup Ready 2 Xtend® soybeans are covered by different patents than original Roundup Ready® soybeans and cannot be saved and planted.

For more information about seed innovation and intellectual property protection, please visit www.seedipalliance.com.

Monsanto Company is a subsidiary of Bayer AG.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Roundup Ready® soybeans, Genuity® Roundup Ready 2 Yield® soybeans, and Roundup Ready 2 Xtend® soybeans have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® soybeans and Roundup Ready 2 Yield® soybeans contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba, the active ingredient in XtendiMax® herbicide with VaporGrip® Technology. Dicamba will kill crops that are not tolerant to dicamba. XtendiMax® herbicide with VaporGrip® Technology is part of the Roundup Ready® Xtend Crop System and is a restricted use pesticide. Genuity®, Roundup Ready®, Roundup Ready 2 Yield®, Roundup Ready 2 Xtend®, Roundup®, VaporGrip® and XtendiMax® are registered trademarks of Bayer Group. ©2019 Bayer Group, All Rights Reserved. {19-00070pc} 5A4N198247
